Students who wish to study or intern abroad must be cleared by a health care provider. When determining a student’s clearance status, please include the following steps and considerations:

1. Discuss/review the student’s health history, paying particular attention to medications and immunizations that the student may need, any allergies the student may have, and all currently active health problems.

2. Perform a thorough physical examination.

3. Pay special attention to any chronic diseases, including emotional or psychological conditions, and any medications the student is taking. Students may be cleared with these conditions provided they are in compliance with, and stable on, their medication.

4. A Specialist Report form is recommended if the patient is under the care of a specialist for a chronic condition or if the need for a specialist evaluation is determined.

5. Please impress on the student that he/she needs to take a sufficient amount of medication to last for the duration of the program abroad, or verify that the medication is locally available and legal.

6. Assess the need for any continued health care, counseling or laboratory testing while abroad so the student can determine the availability of adequate facilities at the program site.

Students may be cleared for participation as long as, in the opinion of the examining provider, any health condition the student may have is under control and has been stable for a reasonable period.
I have reviewed the student's additional information. Based upon this information, to the best of my knowledge, the student is:

- Cleared to study/intern abroad: Any health condition the student may have is under control and has been stable (including any medication required) for a reasonable period.
- Not cleared to study/intern abroad:
  - There are contraindications to participation.
  - More information needed before final decision can be made. (The Clearance Update below will be completed and submitted when the information is received.)

Licensed Health Care Provider (Please print clearly or stamp)

Signature (required)

Name

Telephone number

Clearance Update: Completed by the Health Care Provider

This section is required only if additional information is received which allows a student’s fitness for study abroad to be re-assessed. Health Care Provider must be licensed in the U.S. and cannot be an immediate family member (AMA Code of Ethics E-B-19).
