

MBA+ CORPORATE PARTNERS

Texas MBA+ Leadership Program

MBA+ connects students to companies with which they want to work through short-term micro-consulting projects in the fall or spring. The client company provides a current business question to be addressed, and MBA+ provides a team of four to six students to tackle the issue. MBA+ provides each team with a budget and guides them through the project management process. At the end of an eight to ten-week project period, the team reports their findings and recommendations to their client.
